## A Whipping from the Staff

Staff riders have the absolute right-of-way so that they can proceed in their work without delay. Yield to them immediately whenever you see or hear that they are coming. The cry of "Ware Staff" will alert you that Staff may need to pass by you; always turn your horse's head in their direction when they pass close to you.

This is for everyone's safety as it protects all of the riders, horses and especially hounds!
